Hair Today, Gone Tomorrow

Thinning hairlines have finally met their match. **XFusion keratin hair fibers** from Spencer Forrest offer a commitment-free remedy to hair loss made from the same protein found in human hair. The keratin fibers possess a gentle, electrical charge that makes them cling to the fine hairs on a person's head. The product is simply shaken directly onto the thinning spot, and then remains in place through wind and rain, yet can be easily removed with any shampoo. XFusion fibers blend easily with natural hair and come in eight shades: black, dark brown, medium brown, light brown, blonde, white, gray and auburn. For more info, call 800/277-3316 or visit www.xfusionhair.com.
