ENHANCE THINNING HAIR

Spencer Forrest is proud to introduce XFusion Keratin Hair Fibers, a cosmetic breakthrough that immediately gives thicker-looking hair. When shaken onto thinning hair, the fibers instantly fill out the hair a person already has giving the appearance of having more hair. Made

from pure keratin protein, this all natural cosmetic treatment is a convenient way to simulate the appearance of a full head of hair. XFusion's

packaging is designed to help disperse the keratin fibers evenly. It blends easily and comes in the eight common color shades.
